

# Ignacio Jiménez

FRONT END DEVELOPER

## Profile

Front-end developer with a background in sales and account management, leveraging my consumer-focused mindset and exceptional communication skills to help create innovative solutions and positive User Experience for all.

## Employment History

### Front-End Developer , Metro Markets GmbH, Düsseldorf

FEBRUARY 2022 – PRESENT

Full-time job as Front-End Developer, specializing in the Cart and Checkout flow of METRO's Marketplace. My role involved optimizing user experience, conducting design experiments, implementing server-side rendering to enhance performance, and so on. I initially utilized Angular as the main framework of our monolithic application, and contributed afterwards to the migration of our application to React and NextJS.

Our goal was to offer a diverse range of products and become the preferred online partner for the HoReCa industry, resulting in the marketplace's significant success.

## Education

### Fullstack Web Development Certification Program, CareerFoundry, Berlin,

FEBRUARY 2021 – FEBRUARY 2022

Modules: Introduction to JavaScript; Server-side programming (NodeJS); Client-side programming & ReactJS; Test-driven development (Cypress); Native App Development; Collaboration & Documentation. See more in the [course plan](#).

### Web Development Bootcamp, The App Brewery, (remote)

MAY 2020 – MARCH 2021

Modules: HTML & CSS || JavaScript || NodeJS with ExpressJS || Databases, SQL & NoSQL (MongoDB) and building applications with ReactJS.

## About me

My expertise extends to optimizing critical components of an application, as demonstrated by my experience working with the checkout process of a thriving marketplace, which currently achieves an average net sales of 14M€ monthly. I am well-versed in modern server-side rendering techniques to enhance website performance. Additionally, I excel in conducting design experiments, creating intuitive layouts, and optimizing UI/UX to increase conversion rates.

In addition to my technical skills, I am well-versed in modern working setups, including CI/CD, where I utilize pipelines for meticulous pre-production and production releases. I am experienced in incident management and comfortable working within Agile teams. I actively collaborate with Product Owners, Designers, and other technical team members to make informed decisions and drive successful project outcomes
